CND

[a] an interrupted layer including a thermoplastic [long-term] permanent adhesive adhering to [on] said raised points of said first side of said sheet of glass fiber fabric for holding said sheet of glass fiber fabric to a wall substrate, said thermoplastic [long-term] permanent adhesive having a degree of fluidization designed for preventing the thermoplastic long-term adhesive [being prevented] from penetrating said glass fiber fabric and contaminating said second side of said glass fiber fabric.

8. (Amended) The glass fiber fabric wallpaper sheet of claim 7 wherein said thermoplastic long-term adhesive is water [insoluble] insoluble.

9. (Amended) The glass fiber fabric wallpaper sheet of claim 7, wherein said thermoplastic long-term adhesive comprises one of a water-insoluble hot melt and a pressure sensitive hot-melt adhesive.

10. (Amended) The glass fiber fabric wallpaper sheet of claim 7, wherein said glass fiber fabric sheet [is substantially impermeable to] comprises a structure that resists penetration by said thermoplastic long-term adhesive [for preventing said thermoplastic long-term adhesive from penetrating said glass fiber fabric].

BB

12. (Amended) The glass fiber fabric wallpaper sheet of claim 7, further comprising a removable one of a release film and a sheet of paper on said layer including a thermoplastic long-term adhesive.
